

Newspaper

You are an expert Streamlit developer. Build a clean, professional news fetching web app called "My News Button" with the following exact requirements:

1. Overall App Purpose

- On-demand news fetcher (user clicks a button to get fresh articles).
- Only from these 4 publishers: The Indian Express, Hindustan Times, The Hindu, Economic Times.
- Uses Google News RSS + feedparser.
- Shows only recent articles (last 48 hours).

2. Sidebar Features

- Section "🎯 Select Topics" with checkboxes for these 15 predefined topics: AI, Agentic AI, Technology, Renewable Energy, Economy, Indian Stock Market, Fortune 500, Startups, Automobiles, Cryptocurrency, Politics, Geopolitics, Current Affairs, Sports, Business News
- Section "➕ Add Custom Topic":
 - Text input box
 - "Add Topic" button
 - "Clear Custom" button
- Use `st.session_state` to properly store custom topics so they persist.
- Display all selected topics (predefined + custom) as nice green chips below.
- At the bottom of sidebar: Slider for "Max articles per topic" (default 6, range 3–12)

3. Main Page UI

- Centered big title: "My News Button 📰" with professional font (Georgia)
- Greeting below title: "Hi mate, welcome again"
- Big centered green button: "Fetch Latest News"

4. Results Display

- When button is clicked, show a progress bar.
- Group articles by Topic with a header like "📌 AI — 8 articles"
- For each topic, show a clean HTML table with columns:
 - Article Title (clickable link that opens in new tab)
 - Publisher
 - Published (date and time)
- Use `st.html()` for reliable table rendering.
- Show success message with total articles found.

5. Technical Requirements

- Use light theme with background color #F9F7F0
- Button color: #2C5F4A with white text
- Keep the app simple, clean, and beginner-friendly.
- Include proper error handling (show warning if no topics selected or no articles found).
- Use session_state correctly for custom topics.

Please provide the ****complete, ready-to-use `app.py` code**** with clear section comments. Make sure custom topics work properly when added and when fetching news.

Start by giving the full code.
